

Ahmed Talaat Mohamed

Software Engineer — Full Stack Developer

Alexandria, Egypt (Ready to Relocate) • Phone: +2 01025925154
Email: atalaat635@gmail.com • LinkedIn: linkedin.com/in/ahmed-talaat97 • GitHub: github.com/ahmedtalaat97
Military Service: Completed

SUMMARY

Results-driven Software Engineer with proven expertise building secure, scalable, and high-performance full-stack applications using Go, React, Python, and Java. Experienced in designing enterprise-grade banking systems (Temenos T24), identity management solutions (OIDC), and interactive data portals. Adept at bridging hardware calibration integrations with modern web services inside Agile teams.

PROFESSIONAL EXPERIENCE

Software Engineer — Full Stack Developer Mar 2026 – Present
Si-Ware Systems Cairo, Egypt (Hybrid)
Technologies: Go (Golang), React 19, TypeScript, Tailwind CSS v4, Zustand, Python, PyQt, PostgreSQL, Authentik (OIDC)

- Co-developed full-stack features for the **MEDS Online Portal** using **Go (Gin)** REST APIs and **React 19** (TypeScript, Zustand).
- Customized **Authentik (OIDC)** authentication flows, implementing redirection policies and custom stages to isolate account recovery.
- Enforced multi-tenant isolation and role-based access controls (**RBAC**), implementing backend validation to prevent privilege escalation.
- Developed scan result visualizations with **Recharts** and resolved cross-origin (**CORS**) constraints for image download workflows.
- Engineered client-side state management to cache and dynamically reset scan filters during page navigation.
- Optimized database querying to support batch-upload failure recovery, column sorting, and timezone-aware filtering.
- Refactored the **PyQt Desktop App**, integrating automated database backups, user session validation, and spectrometer calibration DLLs.

Software Engineer — T24 & Java Developer Aug 2025 – Mar 2026
Ejada (Client: Emkan Finance) Cairo, Egypt
Technologies: Java, Temenos T24, RESTful APIs, Oracle DB, Agile

- Engineered custom Java routines and backend business logic within the **Temenos T24** banking platform to optimize transaction flows.
- Developed core financial workflows and integrated secure enterprise APIs, ensuring compliance with international banking standards.
- Collaborated in an Agile structure to design schemas and system integrations, maintaining high-availability across banking modules.

EDUCATION

Information Technology Institute (ITI) Oct 2024 – Jul 2025
Professional Development and BI-Infused CRM Track Alexandria, Egypt

Alexandria University, Faculty of Engineering 2015 – 2020
Bachelor of Science in Civil Engineering Alexandria, Egypt

COURSES & CERTIFICATIONS

- | | |
|---|------------------|
| Full Stack .NET / Angular Diploma — Route Academy | View Certificate |
| Web Design Diploma — NTI | View Certificate |
| Docker Certified Associate Prep — KodeKloud | View Certificate |
| Oracle Cloud Infrastructure (OCI) Foundations Associate | View Certificate |

TECHNICAL SKILLS

Languages: Go (Golang), C#, Python, Java, JavaScript, TypeScript, SQL
Frontend: React 19, Angular, HTML5, CSS3, Tailwind CSS v4, Radix UI, Zustand, Bootstrap, Recharts
Backend: Go (Gin), ASP.NET Core, Node.js, Express, RESTful APIs, Swagger/OpenAPI
Databases & Cache: PostgreSQL, SQL Server, MongoDB, Redis
Identity & DevOps: Authentik (OIDC/OAuth2), Docker, Git, CI/CD, Nginx
Methodologies: Agile/Scrum, Clean Architecture, Object-Oriented Design (OOD), Design Patterns
